HLX741

Modular, compact, inline flow meter for compressed air and gases

The HLX741 inline flow meter is dedicated for accurate metering and monitoring of compressed air and technical gases in DN15 to DN50 pipes.

The thermal measuring principle and the well-proven hot film sensor element lead to best long-term stability and fast response time.

Outstanding measuring accuracy, even in the lower measuring range is achieved by an application-specific multi-point factory adjustment performed at 7 bar (102 psi). This allows reliable leak detection and corresponding energy savings.
The construction of the HLX741 is optimized for easy installation and maintenance.

HLX741

The HLX741 is user configurable and can be easily adapted to any measuring task. The setup can be set using either display and push buttons or the free product configuration software EE-PCS.

Typical applications

- Compressed air consumption measurement
- Monitoring of technical gases O_2, N_2, Ar, CO_2 and other
- Nitrogen generators
- Leak detection

Features

Transmitter
- » For each three pipe diameters
- » Installation and removal without disassembling the pipework facilitates regular calibration
- » Application-specific adjustment under pressure for best accuracy

Display
- » Shows instantaneous values and overall consumption
- » Intuitive device setup with push-buttons
- » Can be rotated in 90° increments

Sensor head and thermal flow sensor
- » Robust design in stainless steel
- » Very short response time
- » Wide measuring range
- » Long-term stable and accurate
- » Negligible pressure drop
- » Highly insensitive to contamination
- » No additional pressure and temperature compensation required

Output
- » User configurable via display or PC
- » 0-20 / 4-20 mA output
- » Two switch outputs
- » Pulse output
- » Modbus RTU
- » M-Bus

Measurands
- » Standard volume flow
- » Mass flow
- » Standard flow
- » Temperature
- » Integrated consumption meter (totalisator) for cost-effective consumption analysis without additional datalogger

Gauge mounting block
- » Precise and reproducible positioning of the transmitter for best accuracy
- » Aluminum or stainless steel
- » Can be operated with sealing plug also without transmitter
Modular design

One and the same transmitter can be used for each of three pipe diameters:

HLX741: DN15 (1/2") / DN20 (3/4") / DN25 (1")
HLX741-N50: DN32 (1-1/4") / DN40 (1-1/2") / DN50 (2")

The pipe diameter is easily changed via the display menu or the Configurator software.

Once the gauge mounting block is built into the pipeline, the transmitter can be installed and removed without disassembling the pipework. As a result, the HLX741 is also ideal for temporary measurement at serveral mounting blocks. The sealing plug included in the scope of supply enable the normal operation of the compressed air system when the transmitter is removed.
Display (optional)

The state-of-the-art LCD shows the current measured values and the overall consumption. The user specific device setup can be easily performed with the push buttons and intuitive menu guidance.

The display can be rotated in 90° increments with a push button for convenient orientation in any mounting position of the flow meter.

The HLX741 without display can be configured by the user via USB interface with the free HLX-PCS product configuration software.

CE

1) Factory setting of the output see manual.
2) The tolerance specifications include the uncertainty of the factory calibration with a coverage factor k=2 (2 x standard deviation). The tolerance was calculated in accordance with EA-4/02 following the GUM (Guide to the Expression of Uncertainty in Measurement).
3) The flow meter is factory adjusted at 7 bar (102 psi) (abs). At operating pressure other than 7 bar (102 psi) (abs), the error can be corrected by entering the actual system pressure via display menu or with HLX-PCS configuration software.

Scope of supply

Item 1: HLX741:
- HLX741 according to ordering guide
- 1 x Allen key
- 1 x USB cable
- M12x1 straight socket, can be assembled
- Operating instructions
- Two self-adhesive labels for configuration changes
  (see user guide at www.epluse.com/relabeling)
- Inspection certificate according to DIN EN10204 - 3.1

Item 2: Gauge mounting block:
- Gauge mounting block incl. sealing plug
