

Infrared thermometer for measuring the temperature of the human body without contact.

By locating the measurement spot on the patient's forehead, the instrument is capable of measuring and recording the temperature body by simply pressing the measurement button (trigger) and indicating it on a large LCD display.

Measuring distance variable between 3 and 5 centimeters.

Warning: the instrument is NOT a medical device

Technical Features

Accuracy	±0,2° Human
Distance Spot Ratio	3-5 cm
Emissivity	0,95
Response Time	500ms (8-14 µm)
Repeatability	±1% o ±1°C
Resolution	0,1°C
Selection	°C °F
Data Hold Function	YES
Laser Target Selection	YES
Auto Power Shut Off	YES
Low Battery Indication	YES
Power Battery	2xAAA

Notes: Colors may vary. The instrument keys may be positioned differently
